01 — EXECUTIVE SUMMARY

The Problem. The Solution. The Opportunity.

Quasar Salon today relies on phone calls, WhatsApp messages, and manual diary entries to manage appointments. This creates friction — for the owner who has to track everything manually, for staff who are unsure of their daily schedule, and for customers who have to wait for a human response to book a simple haircut.

Current Pain Points	
No-shows with no advance notice	Lost revenue on every empty slot
Staff unsure who is booked and when	Confusion leads to double-bookings
Customers have to call or message to book	Friction = lost customers
No visibility into daily revenue	No data to make business decisions
Manual reminders for every client	Hours wasted on admin tasks

Everyday Digital Solutions will build Quasar Salon a fully branded, professionally designed mobile application available on both the Apple App Store and Google Play Store. The app will eliminate all of the above problems — permanently — and give Quasar Salon a competitive edge that most salons in the city do not have.

Clients book 24/7	No more missed calls or late-night WhatsApp messages.
Advance payments hold slots	No-shows become a thing of the past.
Staff get instant notifications	Every stylist knows their schedule the moment a booking is made.
Owner sees everything	Live dashboard: bookings, revenue, staff, and slot availability.

02 — ABOUT US

Everyday Digital Solutions

We are a technology company focused on building practical digital products for small and medium businesses.

We specialise in mobile applications, web platforms, and automation systems that solve real, everyday business problems. Our approach is simple: we listen first, design second, and build fast. We do not believe in bloated timelines or unnecessary complexity — we deliver working products on time, every time.

Fast Delivery	Transparent Pricing	Long-term Support
We commit to 30–45 day delivery. No excuses.	You know the full cost before we start. No surprises.	We stay with you after launch. You are never alone.

03 — PROJECT OVERVIEW

What We Are Building for Quasar Salon

A complete, branded, end-to-end appointment management ecosystem — two apps in one.

We will build two tightly integrated interfaces: a Customer-facing mobile app that your clients download and use to discover services, book appointments, choose their preferred stylist, and pay in advance — and a powerful Admin Dashboard that you and your team use every day to manage attendance, track bookings, and run the business.

Customer App	Admin Dashboard
Available on App Store & Play Store • Browse all salon services • View stylist profiles & ratings • Book single or multiple services • Pay in advance to hold slot • Get automated reminders • Reschedule or cancel bookings • View booking history • OTP-based phone login	Owner & Staff management portal • Mark staff attendance daily • View all bookings live • Add & edit services • Manage stylist profiles • Revenue & analytics dashboard • Manual booking creation • Send notifications to clients • Cancellation & refund control

04 — CUSTOMER APP

Complete Feature Breakdown — What Your Clients Experience

The customer-facing app is available as a free download on the Apple App Store and Google Play Store. Your clients will find Quasar Salon, create an account in 30 seconds, and book their appointment without calling anyone.

01

Onboarding & Login

Clients sign up using their phone number. A one-time password (OTP) is sent via SMS. No passwords to remember. No complicated forms. First-time setup takes under 60 seconds. Returning customers are logged in automatically.

02

Service Discovery

A clean, beautifully designed menu shows all services Quasar Salon offers — haircut, hair spa, beard trim, facial, manicure, pedicure, bridal makeup, highlights, and more. Each service shows the name, price, estimated duration, and which stylists perform it. Services can be filtered by category. You can add, update, or remove services at any time from the Admin panel.

03

Multi-Service Booking

Clients can select more than one service in a single booking session. For example, a client can book a Haircut + Beard Trim + Hair Spa together. The app automatically calculates total price and total duration, and blocks the correct amount of time on the stylist's calendar.

04

Stylist Selection

Each stylist has their own profile page with their photo, name, specialities, and star rating. Clients can choose a preferred stylist or select "Any Available Stylist." If a stylist is marked as absent for the day by the admin, they are automatically hidden from the booking screen — clients will never see or try to book with a stylist who is not present.

05

Real-Time Slot Availability

The booking calendar only shows genuinely available time slots. Already-booked or blocked times are shown as greyed out — clients cannot select them. There is zero possibility of a double booking. The slot availability updates in real time — the moment someone books a slot, it disappears for everyone else.

06

Advance Payment to Hold Slot

Clients pay in advance to confirm and secure their appointment. Accepted payment methods include UPI (GPay, PhonePe, Paytm), Debit and Credit Cards (Visa, Mastercard, RuPay), Net Banking, and Pay at Salon. Advance payment dramatically reduces no-shows. If a client pays and does not show up, the salon retains the booking amount per your cancellation policy.

07

Automated Reminders & Notifications

The app automatically sends a reminder notification 24 hours before the appointment and again 1 hour before. Reminders are delivered via push notification and optionally via SMS. Clients also receive instant confirmation when they book, and a thank-you notification after their visit. No manual follow-up required from your staff.

08

Reschedule & Cancellation

Clients can reschedule their appointment from within the app, subject to availability. They can also cancel — with the cancellation window (e.g. "Cancel up to 2 hours before") set by you. Refund processing is handled automatically. Cancelled slots are immediately released back as available for other clients.

09

Booking History

Every client can see their full booking history — past visits, services taken, stylist, date, and amount paid. This builds a long-term relationship between the client and the salon and encourages repeat visits.

10

Ratings & Reviews

After each completed appointment, clients are invited to rate their experience and leave a short review. This helps new customers trust Quasar Salon and helps you identify your best-performing stylists.

05 — ADMIN DASHBOARD

Complete Feature Breakdown — Your Business Command Centre

The Admin Dashboard is your private management portal. It gives you complete visibility and control over every aspect of your salon's daily operations. Accessible securely via your phone or tablet.

01

Staff Attendance Management

Every morning, you open the app and mark which staff members are working that day. A single tap marks a stylist as "Available" or "On Leave." The moment you mark someone as unavailable, their name and time slots are immediately removed from the customer booking screen. Clients will never attempt to book with an absent stylist. You can also see a weekly attendance log and track who was present on which days.

02

Live Bookings Dashboard

A real-time overview of all bookings for the day — who is booked, at what time, for which service, with which stylist, and the payment status. Upcoming bookings are shown in chronological order. You can filter by stylist, by service, or by status (Confirmed, Pending, Completed, Cancelled). A colour-coded status system makes the dashboard instantly readable at a glance.

03

Booking Management

As the owner or manager, you can create bookings manually on behalf of walk-in clients or clients who call in. You can edit any existing booking — change the time, stylist, or service. You can mark bookings as Completed once the service is done. You can cancel bookings and process refunds. All changes are reflected instantly and the client is notified automatically.

04

Service & Pricing Management

Add new services to the menu at any time — enter the service name, price, duration, and which stylists are qualified to perform it. Edit existing service prices or durations instantly (e.g. seasonal pricing or festive offers). Remove discontinued services from the menu. All changes are live within seconds — clients see the updated menu immediately.

05

Stylist Profile Management

Maintain a digital profile for each stylist — their name, photo, bio, specialities, and assigned services. Track each stylist's performance: number of bookings, total revenue generated, and average client rating. Identify your highest-performing stylists and services at a glance.

06

Revenue & Analytics Dashboard

A built-in analytics panel shows you daily, weekly, and monthly revenue figures. See which services generate the most income. Identify peak hours and days to optimise staffing. View total number of appointments, cancellations, and no-show rates. This data helps you make smarter decisions — when to run promotions, when to hire additional staff, and which services to invest in.

07

Push Notifications to Clients

Send bulk or individual notifications directly to your clients from the admin panel. Announce a new service, share a festive discount, or remind clients about a seasonal offer. All without WhatsApp broadcasts or manual messaging. Notifications are delivered instantly to all clients who have the app installed.

08

Cancellation & Refund Policy Control

Define your own cancellation rules — how many hours before an appointment a client can cancel, whether they receive a full refund, partial refund, or no refund. The app enforces these rules automatically. You never have to personally manage a refund dispute.

09

Slot Blocking & Salon Holidays

Block specific time slots or entire days (for holidays, events, or maintenance) directly from the admin panel. Blocked days and times are immediately removed from the client booking screen. Add recurring weekly-off days (e.g. Mondays) that are automatically blocked every week without any manual action.

How It Is Built & Where It Will Live

The Quasar Salon app will be built using industry-standard, proven technologies chosen for performance, reliability, and ease of maintenance. Below is a plain-language explanation of the key components.

Component	Technology	What It Does
Mobile App (iOS + Android)	React Native / Flutter	One app codebase. Works on both iPhone and Android.
Database & Backend	Firebase / Supabase	Stores all bookings, users, services. Real-time sync.
Payments	Razorpay	Accepts UPI, cards, net banking. Industry-standard.
Notifications	Firebase Cloud Messaging	Instant push notifications to clients and staff.
SMS / OTP	MSG91 / Twilio	OTP for client login. SMS reminders.
Hosting	Google Cloud (via Firebase)	99.9% uptime. Scales as your client base grows.
App Store	Apple App Store	iPhone users can download from the App Store.
Play Store	Google Play Store	Android users can download from the Play Store.

App Store Publishing (Included in Project)

Google Play Store	Apple App Store
Registration fee: \$25 one-time (~₹2,100) Review time: 1–3 business days For Android users on all devices	Registration fee: \$99/year (~₹8,200) Review time: 3–7 business days For all iPhone and iPad users

07 — PROJECT TIMELINE

30 to 45 Day Delivery Plan

The project is divided into 5 clear phases. Each phase has defined deliverables. You are kept informed at every step.

1

Discovery & Design (Days 1–7)

- Finalise all services, pricing, and stylist list
- Design all app screens (customer + admin)
- Approve final designs before development begins

Week 1

2

Backend Development (Days 8–18)

- Set up database, user authentication, booking engine
- Build real-time availability logic
- Integrate payment gateway (Razorpay)
- Set up push notifications and SMS OTP

Days 8–18

3

Customer App Development (Days 14–28)

- Build all customer-facing screens
- Service listing, stylist picker, time slot booking
- Payment flow, confirmation, reminders

Days 14–28

4

Admin Panel Development (Days 20–35)

- Build staff attendance marking system
- Bookings dashboard and management tools
- Service/stylist management, analytics

Days 20–35

5

Testing, Publishing & Handover (Days 36–45)

- Full testing on real Android and iOS devices
- Submit to Google Play Store and Apple App Store
- Training session for owner and staff
- Go live and handover

Days 36–45

Milestone	What You Receive	Day
Design Approval	All screens designed and signed off	7
Backend Demo	Booking engine working, live database	18

Beta App Build	Working app on your phone for testing	30
App Store Submission	Both apps submitted for review	38
Go Live	Apps live, clients can download and book	45

08 — INVESTMENT & PRICING

Full Transparency. No Hidden Costs.

The investment below covers everything — design, development, testing, and publishing on both App Store and Play Store. There are no surprises. The price agreed today is the price you pay.

Service	Description	Amount
UI/UX Design	All screens designed for customer app and admin dashboard	■18,000
Backend Development	Database, booking engine, payments, notifications, auth	■42,000
Customer Mobile App	Full React Native app (iOS + Android)	■48,000
Admin Dashboard	Owner/staff management portal	■28,000
Payment Integration	Razorpay UPI, Cards, Pay-at-Salon setup	■8,000
Testing & QA	Full testing on real devices, bug fixes	■6,000
App Store Publishing	Submission and approval on both stores	Included
Training & Handover	Staff training session + documentation	Included
Post-Launch Support	30 days of free bug fixes after go-live	Included

■1,58,000

Payment Schedule	Amount	When
Advance (to begin work)	■60,000 (38%)	On signing this proposal
Milestone 1 — Beta App Ready	■60,000 (38%)	When you approve the work
Final Payment — On Go Live	■38,000 (24%)	When app is live on both sto

All prices are inclusive of applicable taxes. App Store (\$25) and Apple Developer (\$99/year) registration fees are the responsibility of the client. Monthly hosting costs after launch are approximately ■1,500–3,000/month depending on usage.

09 — AFTER LAUNCH

What Happens When the App Goes Live

Our relationship does not end when the app goes live. We are committed to your long-term success.

30 Days Free Support	Any bugs or issues found within 30 days of launch are fixed at no additional charge.
Monthly Maintenance Plan	Optional ■3,000–5,000/month plan covering hosting management, minor updates, and priority support.
Feature Upgrades	As Quasar Salon grows, we can add new features — loyalty points, referral system, multi-branch support, WhatsApp integration.
App Store Updates	We handle any required app updates when Apple or Google update their requirements.
Training for New Staff	Any new staff who join the salon can be trained on the admin system at no charge.

10 — TERMS & NEXT STEPS

Ready to Get Started?

This proposal is valid for 30 days from the date of issue. To proceed, please confirm your acceptance and transfer the advance payment. Work begins within 24 hours of payment confirmation.

- Step 1

Review this proposal and confirm via WhatsApp or email.
- Step 2

Transfer the advance of █60,000 to begin the project.
- Step 3

Schedule a 1-hour kickoff call to finalise services, prices, and design preferences.
- Step 4

We begin design and development. Weekly updates shared with you.
- Step 5

App goes live on both stores within 30–45 days.

Everyday Digital Solutions

This proposal was prepared exclusively for **Quasar Salon**. Contents are confidential.

We look forward to building something exceptional for Quasar Salon. The technology exists. The plan is ready. All that remains is your decision.

Issued: April 2026 | Valid Until: May 2026 | Proposal Ref: EDS-QS-2026-01
